01 UNIQUE PLLA-mPEG POLYMERIZATION PROCESS

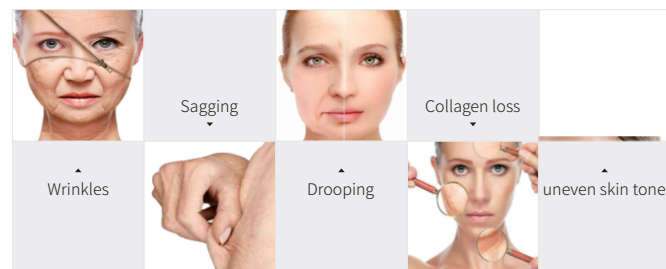

- PLLA-mPEG adopts a non-toxic special process, which is more safer and pure than stannous caprylate commonly used in the industry.

02 MACHANISM OF ACTION

- PLLA-mPEG is absorbed by the skin.
 - Start to release moisture.
 - Skin is moisturized and shiny.
- PLLA-mPEG breaks down into lactic acid.
 - Acts on again fibroblasts.
 - Activate type I and type III collagen, improve skin regeneration.
- Collagen type I and type III co-build the skin collagen fiber structure
 - Comprehensively improve skin structure and delay aging.

03 SUITABLE CROWD

04 INSTRUCTION

Operated with hydro lifting , MTS instruments, 3 times/course, following the doctor's advice , following the course of treatment, and use it with repair series products after surgery.
